

One Hundred years In The Future

I would rather be 100 years in the future because I could go in a time machine and get Albert Einstein and sell him for millions of dollars and I'd be able to zoom around in new technology and the new scientist would make me into a superhero I would be Hulk, smash, Spider man, Venom, Captain America, Superman, Batman, Iron man, Black panther, I would be all the superheroes and we'd get cryptocurrency and kids could drive cars and have safe smartphones so I think the conclusion is definitely got to the future and be able to have Lego robots.
